1. Codes

Go to state.uhsjcl.org. No usernames/passwords. Everyone signs in with a permanent code like XXX-XXXXX-XXXXX . The first three letters are SP0 for a sponsor, VOL for parents/chaperones, and DEL for a delegate. Your codes are on Discord!

Sponsors will give attendees their code on a printed packet. That packet will also have QR codes that attendees can use to sign in with on mobile devices, instead of typing out their code. If somebody loses a code, you need to issue a new one ([§8](#)).

2. Overview

When you log in, you'll see this menu.

Welcome Registration | Registration Chapters Check-in

The first **Registration** is your own form (I might change the second to **Overview** later). Those after the divider are your job.

Registration (maybe Overview)	See stuff.
Chapters	Do stuff.
Check-in	Check-in process on March 12th!

At the far right of that row is a small sun or moon. It switches the site between light and dark, remembers which you picked on that device, and does nothing else. Left alone it follows whatever your phone or laptop is already set to.

3. Chapters

To create a chapter, **Chapters** → **Add a chapter**.

- **Name** — Use the full name, with *Middle School* or *High School* at the end (even though this is redundant). This may require Googling.
- **City** — why not? I was too lazy to argue with Claude.
- **Level** — If a school sends both a middle and a high school delegation, create **two chapters**.
- **Discount** — If there's any special discount, it has to be applied manually.
- **This chapter is not billed** — SCL doesn't pay.

Once you create a new chapter, your first step is **adding a sponsor**. Once you create their account, it shows you the sponsor's access code. Email that code to just the sponsor ([S 4](#)).

If that initial code is lost, it cannot be recovered. However, you can always issue a replacement code ([S 8](#)).

4. Email

This is the one message that opens registration. For most sponsors it is the only thing they will read before they start. This is a draft that Claude wrote, so rewrite and double check the values.

Subject: Registration is open — 72nd CAJCL State Convention, March 12–13

salvē [nomen],

The **72nd California Junior Classical League State Convention** will be held **March 12–13, 2027**, hosted jointly by University and Woodbridge High School.

Registration is online this year, at state.uhsjcl.org. Your access code is at the bottom of this email.

What to do first

Sign in and paste your roster. You do not need to format it — paste a column out of a spreadsheet, a numbered list, or one name per line, and it will read it. You will see exactly what it understood before anything is saved, and you can correct any row.

Each of your delegates and adults then gets a sheet with their own access code. Print the packet and hand each sheet to the person named on it. They sign in and complete their own form digitally, which functions as the student activity sheet from previous years.

What it costs

Per delegate	\$140.00
Adults	one free per 10 delegates
Each additional adult	\$75.00

Your invoice is on the site and updates itself as your roster changes, so check it there rather than working from a printed copy. Make checks payable to **University High School JCL c/o Mark Michalak**, and write your chapter name on the memo line so we can match the payment to your invoice.

Dates to keep

Forms close	February 13, 2027
Payment due	February 13, 2027
Convention	March 12–13, 2027

After the forms deadline your delegates can no longer edit their own answers. You can still ask a registration chair to reopen a form.

Three forms remain on paper

- **Student Waiver** — every delegate, parent or guardian signature required
- **Student Medical Form** — every delegate, parent or guardian signature required
- **Adult Medical Form** — every adult attending, sponsors included

We've kept the process identical to previous years.

If something goes wrong

Reply to this email, or write to state@uhsjcl.org. If a delegate loses their sheet you can issue them a new code yourself from your roster — the old one stops working immediately.

We are looking forward to seeing your chapter in March.

[nomina]
Registration Chairs, 72nd CAJCL State Convention
state@uhsjcl.org

Your chapter: [Chapter name]
Your access code: SP0-XXXXX-XXXXX

Keep this code private. Anyone who has it can sign in as you and see your whole chapter. If you lose it, we can issue another.

5. Registration

This page has all the important details. The five figures at the top:

Chapters	How many, and how many have anybody on their roster yet
Delegates	
Adults	Split into sponsors and chaperones
Forms complete	Out of everyone attending

Still owed	And how many chapters have settled
------------	------------------------------------

- Complete* has a specific meaning.
- A **delegate** is complete when they have submitted their own registration form online *and* their waiver and medical form have reached their sponsor, who has ticked both.
- An **adult** is complete when they have submitted their registration form online and their medical form has been ticked.

SCL is listed as a chapter in the table below to make things easier, but they don't complete the forms.

6. Money

There are no refunds! Go to the **Chapters** tab. Every chapter shows what it owes, what it has paid, and the balance. When you receive an invoice, press **Payment** on a chapter's row and enter the relevant details.

Payments are only ever added, never edited or deleted (good recordkeeping practice). If you enter \$1,400 and it should have been \$140, **add a second payment of –\$1,260** (and then a note). The balance is always the sum of everything recorded, and the trail shows what actually happened and when.

The invoice recalculates itself. Adding a delegate changes what a chapter owes the moment the roster changes. Never work from a printed copy, or from a figure somebody read to you last week.

Somebody who withdraws after their chapter paid still counts. There are no refunds, so they stay on the invoice. Somebody who withdraws before the chapter paid comes off it. The site tracks the difference; you do not have to.

7. Chapter

You can view an individual chapter from **Chapters → Roster**, or by clicking a chapter's name on Overview. You see who is in it, what each person is, and their number — the same number printed on their sheet, so a sponsor reading one out over the phone is reading the same thing you are looking at.

Position is more useful than "Adult" repeated down a column. It shows Sponsor, Chaperone, SCL — or a board title. What you can do here:

Paste a roster	For a sponsor who cannot get their own spreadsheet in. A second paste adds to the roster; it does not replace it.
Add one person	One name, and whether they are a delegate, chaperone or sponsor. Shows their new code once.
Add the sponsor	Only appears when a chapter has none. Same thing, and it is how a new chapter gets somebody who can sign in.
Edit	Corrects a name. Their code does not change.
New code	On one person's row. Their old code stops working at once.
Issue new codes	The same for several people. Tick them, then confirm.
Reopen form	Lets one person edit their own answers again after the deadline. Close form puts them back.
Waive sheet	For somebody added at the desk. They count as complete without an activity sheet — their waiver and medical are still required.
Cancel	Takes somebody off the roster. Reversible.
Make leader	Marks a delegate as chapter leader.
Preview packet	The printed sheets (preview).
Show [n] cancelled	Shows everyone cancelled.

The **Activities** column says where each person's own form has got to: *Not yet*, *Submitted*, *Waived*, and *Reopened* beside the first two when you have opened one back up.

Preview packet is a preview, not something to hand out. Because codes are stored scrambled, the preview shows blocks where the codes would be. To produce a sheet somebody can actually use, issue them a new code — the screen that follows has the print link for exactly those sheets.

You will not see grades, Latin levels, or the paper-form ticks here. Those are the sponsor's working state. The paper ticks especially: whether a waiver has physically reached somebody's hands is the one thing on this page you should not quietly record on their behalf. The sponsor sees all of it on their own roster.

8. Uhoh

"I lost my code" / "My delegate lost their sheet"

Sponsors can fix this themselves with a single button on their roster, and you should remind them of this feature. If you need to do it for them, open the chapter's roster, locate the individual, and click **New code**. The new code will display only once alongside a reprint link. Print the sheet immediately before navigating away. This action instantly voids the old code and signs out any devices using it. If an entire chapter loses their sheets (which happens when printouts are left behind in classrooms), click **Issue new codes**, select everyone, and print a new batch all at once.

"The site says my code is wrong and it isn't"

This is almost always caused by one of three things:

- **The code was reissued:** They are trying to use an old sheet. This is the most common issue.
- **Too many tries:** Five incorrect attempts within an hour will temporarily lock the code. Have them wait, then try again.
- **A genuine mis-read:** The system never uses the letters **I** , **L** , **O** , or **Z** to prevent confusion with **1** , **0** , and **2** . If a user types an **O** instead of a zero, the site automatically corrects it. It also ignores case, extra spaces, and missing dashes. However, because every code includes a check character, a genuinely mistyped letter will trigger an error instead of logging them into the wrong account.

"I need to change a delegate's name"

Open the chapter's roster, find them, and click **Edit**. First, middle, last and suffix. Their access code does not change, so the sheet in their hand still works, and nothing they have filled in themselves is touched.

The sponsor can do the same from their own roster, so it is worth telling them.

"My delegate submitted their form with the wrong Latin level"

Open the chapter's roster and click **Reopen form** on their row. They can then edit their own answers again, deadline or no deadline, and the row shows *Reopened* so the next person to look at it knows why.

Click **Close form** when they are done. If you forget, nothing breaks — they simply keep the ability to edit.

Sponsors cannot do this. It is a registration chair's button.

"The deadline passed and we still need to change something"

The deadline only stops delegates editing their own submissions. **Reopen form** on their roster row lifts it for that one person, and everything you can do from the roster — adding, cancelling, correcting a name, issuing a code — was never affected by it.

"A chapter paid the wrong amount"

Log a second transaction for the difference, whether it is a positive or negative amount. Never attempt to edit the original payment entry (see [§6](#)).

"Somebody dropped out"

Click **Cancel** next to their name on the roster. If the chapter has already paid, the delegate remains on the invoice since we do not issue refunds. However, cancelling them removes them from the meal count so we do not over-order food.

"A chapter says their invoice is wrong"

Review the live website invoice with them instead of their printed copy. Almost all discrepancies occur because the roster was updated after the invoice was printed. If the math still appears incorrect, it is usually due to the free-adult ratio: chapters get one free adult per ten delegates, meaning the eleventh delegate unlocks a second free adult. If necessary, apply a discount: **Chapters** → **Edit** on their row, with a reason, which then prints on their invoice.

"The page is spinning / says the server is not responding"

The server enters a sleep state during periods of inactivity and requires a few seconds to wake up. The site intentionally displays a "waking" message rather than hanging silently. If this loading state persists for more than thirty seconds, notify an admin.

"Somebody registered who should not have"

Cancel their registration immediately. The system automatically logs every change, including the timestamp and the user who executed it, so you do not need to maintain separate manual records of these actions.

9. Arrival

Check-in is per chapter and not per person. Tap anywhere on a chapter's row. That opens a panel with:

- **Notes.** Anything the desk needs to remember: how many Certamen machines, whether they brought a catapult, who is missing, what they are waiting on.
- **Registration complete** — marks them arrived, with the time.
- **Unregister** — un-marks them.

Other options:

- **Add a delegate** — for somebody turning up in place of a delegate who could not come. Two fields, and their code appears immediately. Write it down or photograph it before you close the panel; it is not shown again.
- **Open the roster** — everything else. Cancelling the person they replaced, issuing a code to somebody who lost their sheet, correcting a name.

A delegate added here has their activity sheet waived automatically. The tests were printed and the food ordered weeks ago, so there is nothing left for their answers to change, and without the waiver they would sit in their chapter's completion figure as permanently unfinished.

Their waiver and medical form are not waived. Those are safety documents and nobody is exempt. Check the paper at the desk as you would for anybody else.

10. Limitations

There are some system limitations are intentional security measures, while others are simply features that have not been developed yet.

- **Sign in as somebody else:** Only a convention president or an admin has this clearance.
- **Change the fee, the deadlines, or any wording on the site:** These configurations are strictly managed by the convention presidents.

- **Read the audit log:** While the system records everything you do, reviewing those logs is a task reserved for the presidents.
- **Touch medical or waiver documents:** Physical paperwork is completely segregated from this system. Sponsors scan these into a separate Google Drive folder that the registration site does not access. Physical copies are handed over at check-in.
- **Collect delegate email addresses:** We purposely do not request or store this information.
